## Spring time “*mineral rich*” special

It's time to get ready for spring planting, so make sure you put the minerals back into your plants so you will enjoy “real food” instead of “Holograms”. **OceanSolution** is a concentrate derived from ocean water which contains all 90 plus elements in perfect balance similar to human blood and perfect for any plant, tree, sprouts, seed soaking, home garden, farm, hydroponics, flowers, house plants etc... Minerals are the building blocks to *all* life-forms and without them we would not exist. Our food supply has been seriously depleted from modern farming techniques and natural erosion. All the minerals end up back in the oceans of the world and are held in perfect balance for us so we don't have to re-create creation. It's already perfect! All based on Dr. Maynard Murray's 40 years of research with nothing but success on plants and animals concluding all his experiments!

We are giving **10% off** of **OceanSolution** in any size to meet your growing needs for the month of April. Pick up your minerals today and taste the **OceanGrown** difference! More and more consumers are demanding “Certified **OceanGrown**” mineral rich foods! Get your local farmers and growers to put the missing minerals back into your food!

Also testimonial contest; we have a lot of great testimonials but getting them is like pulling teeth>LOL. So we are holding a contest, first prize, \$100.00 cash, second prize, 1- TDS meter and third prize, 1- litre of **OceanSolution**! Please e-mail to [gino@oceangrowncanada.com](mailto:gino@oceangrowncanada.com) or mail to address above. Deadline is April 30/06.
